New Generation  
Kitchen Experience

**SILVERLINE**

Silverline was founded in 1994 to serve in the built-in appliances sector. It offers enjoyable cooking experience for millions of kitchens in more than 70 countries with the mission “transforming kitchens into attractive living spaces with innovative designs and environmentally friendly solutions.”

Silverline focuses on innovation, technology and design, and is one of the largest hood manufacturer in the world. The company has a production capacity of 2.3 million units at its facilities, where it has integrated the new-generation production technologies. Offering innovative products, Silverline has so far received more than 160 international awards, including the most prestigious awards in the world such as the Good Design, Red-Dot, Plus X Award, IF Design, and German Design Award.

Silverline carefully assesses the impacts of its activities and products on the environment and all of its shareholders, and aims to create sustainable value for a better life and a better world.

## new generation kitchen experience

The dynamics of the age we are living in are our guide. Demand, likes, trends. Our corporate culture is based on the know-how and experience we have accumulated throughout our history. All these values constitute the commitment we represent. Contemporary, far-from-obsolete, innovative products employing the latest technologies and improving quality of life.

# our design approach

The kitchens in our living spaces have had different meanings throughout ages. Today, the kitchen is more than just a cooking area in our homes. New urban lifestyles, such as high technology, common area use and high efficiency, have changed the characteristics of kitchens, making them more integrated into our daily lives. Therefore, Silverline offers an approach that focuses on the changes in the meaning and characteristics of the kitchen while creating new design solutions.

Based on sectoral trends in our designs in the cooking appliances line, we looked for new ways that are meaningful and fascinating for the end user, that emphasize the strong stance of the brand in the built-in appliances industry, that are user-centered and are simplified for the user.

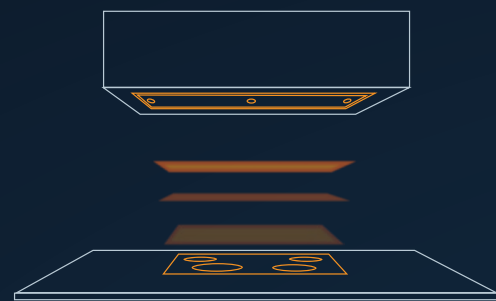

# HOODS

High performance is achieved through smart technologies and strong design. As we spend a great deal of our time there, who doesn't want a clean and aesthetic kitchen?

# TECHNOLOGIES

## SilverConnect

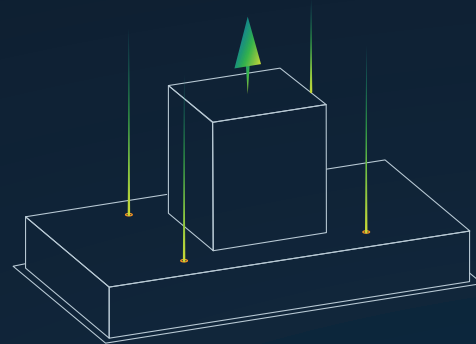

### Bringing intelligence to your kitchen and joy to your life!

Let your cooking and ventilating systems work in harmony, you just enjoy your kitchen.

Connecting the hood with the hob, SilverConnect ensures that ventilation is enabled the minute the cooking process starts. Adjusting the level of ventilation according to the cooking temperature, this technology brings ease of use and innovation to the kitchen.

## SilverWire

### Easy installation

SilverWire, the steel hanging system that permits easy installation of hoods, offers ease of installation and saves you time.

The hood is easily positioned with the help of 4 steel wires and can be installed by one person only.

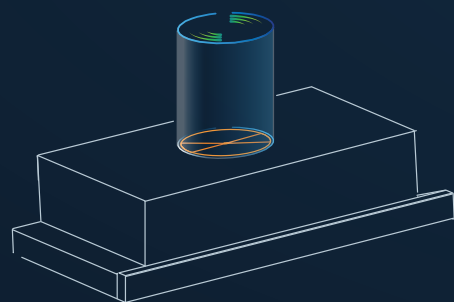

## SilverAIS

### Fresh air in your kitchen

Thanks to the AIS technology, the air in your kitchen is under control. When the hood opens, the external valve opens automatically thanks to the RS system to ensure clean air circulation inside. All you need to do is integrate the AIS system in your kitchen hood to make sure that the air in your kitchen is always clean.

## SilverCVS Central Ventilation System

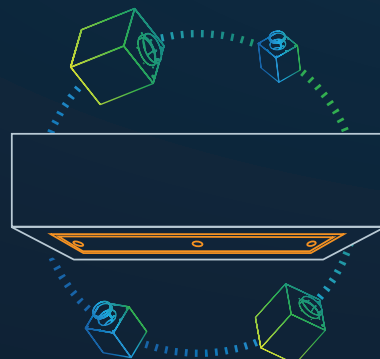

### Maximum technology and energy efficiency!

Developed by Silverline R&D Center, the SilverCVS (Central Ventilation System) technology is integrated into the central airflow stations of the building to optimise energy efficiency.

Having the ability to clean the ambient air without running the hood motor, this system comes to the fore with a low noise level (26 dB) and the self-cleaning function.

## SilverFlex

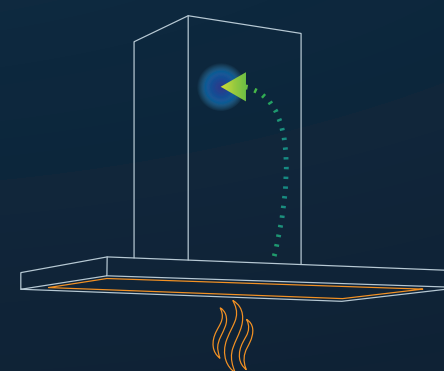

### The silence that your kitchen needs...

Allowing the hood motor to be moved outside in a modular way, the SilverFlex technology offers the user a convenient kitchen experience.

Ensuring that the ventilation motor, the primary source of noise of hoods can be installed outside, this special technology is the beginning of a new silent era in the kitchen.

## SilverSwitch

### The flexible circulating air / Exhaust air circuit

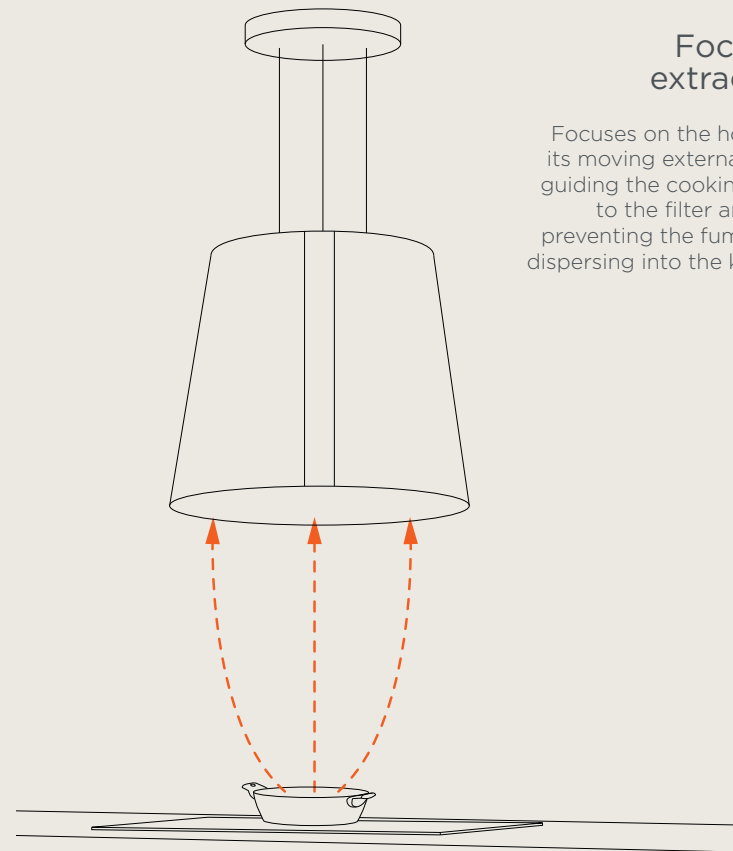

Silver Switch Deluxe makes planning exhaust air in summer particularly easy, since no more between the installation of a recirculation or exhaust air system must become. Because Silver Switch Deluxe can do both. At will between recirculation and exhaust air operation be switched, what a high flexibility in the kitchen climate. Silver Switch converts to many ducted Wall and island hoods from Install and retrofit Silverline, provided this with an exhaust duct operate.

## we manage extraction in many ways

Silverline hoods provide you with a fume-free and fresh kitchen thanks to their unique design and different extraction systems for all types of kitchens.

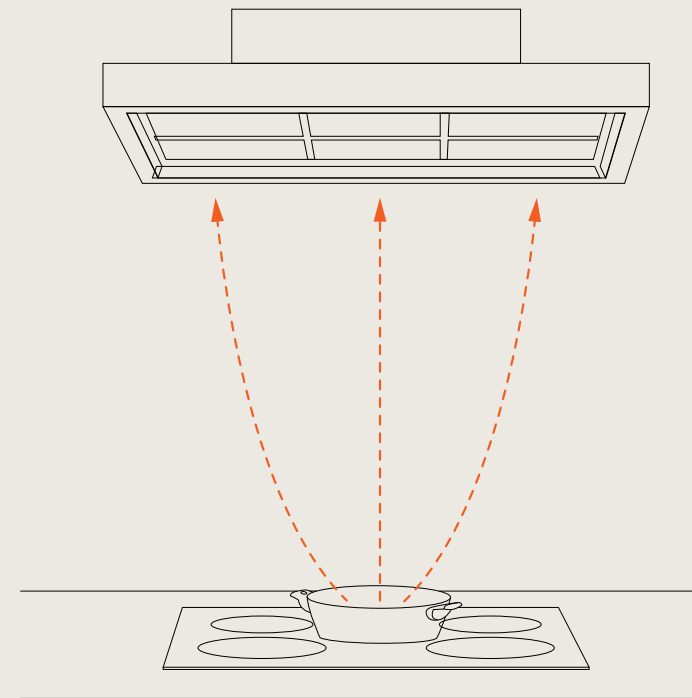

You can cook in peace in your kitchen with the noise level reduced down to 34 dB thanks to this feature.

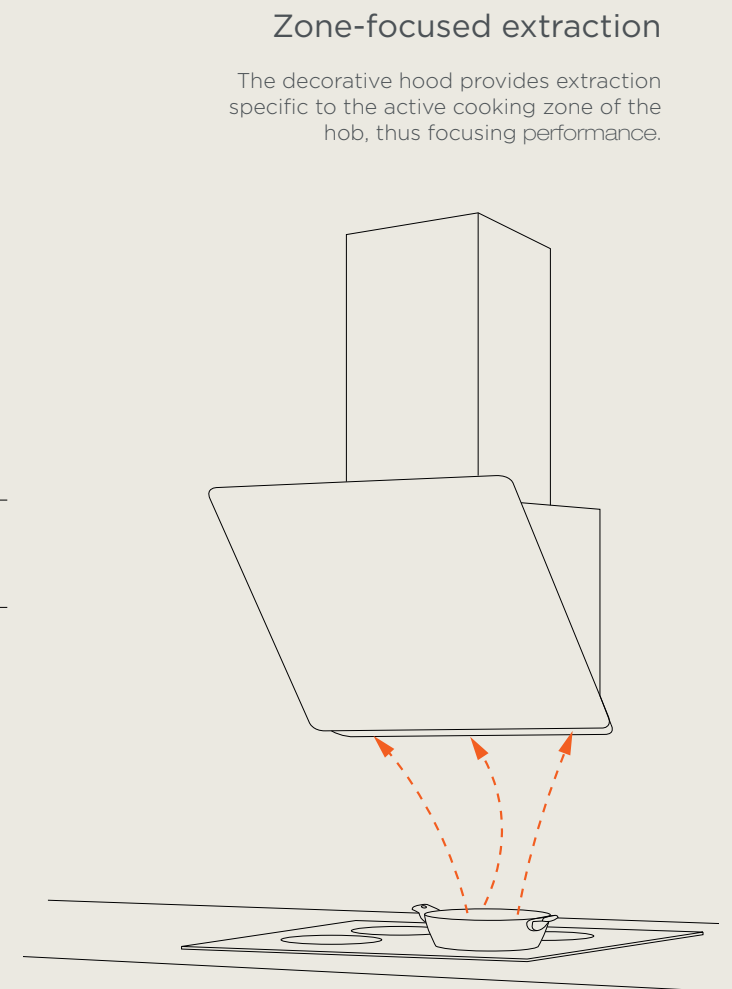

### Focused extraction

Focuses on the hob with its moving external body, guiding the cooking fume to the filter and thus preventing the fume from dispersing into the kitchen.

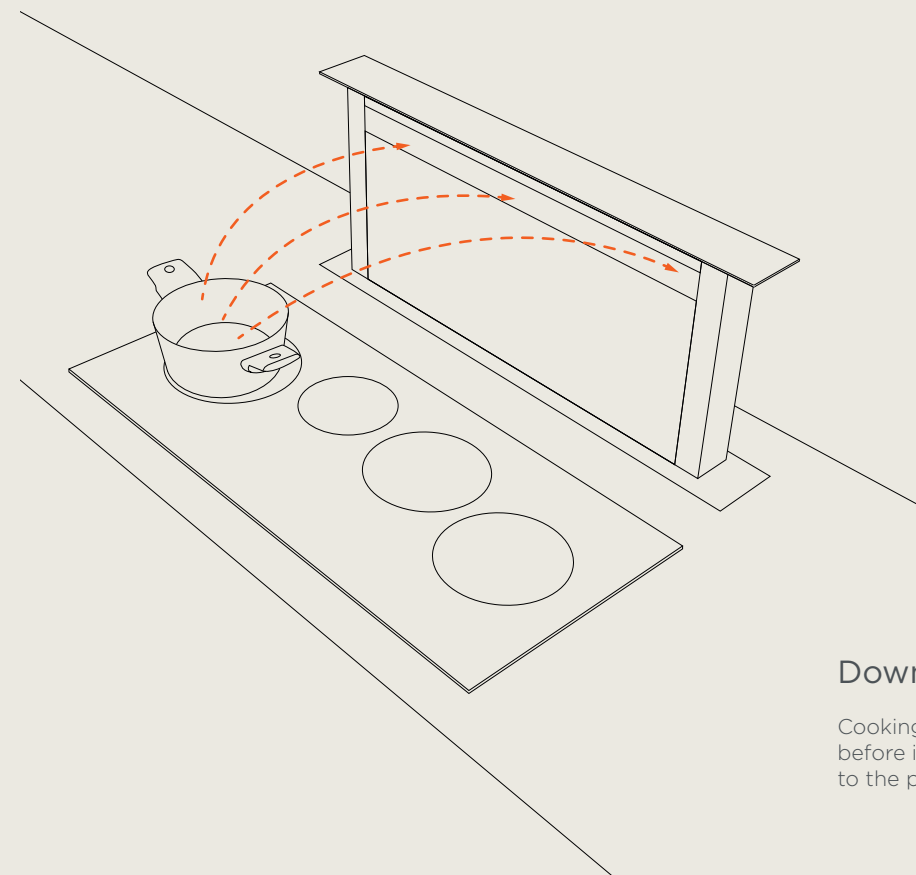

### Ceiling Extraction

Effectively removes cooking fumes and unpleasant odors from kitchen. The system is available both internal and external circulation.

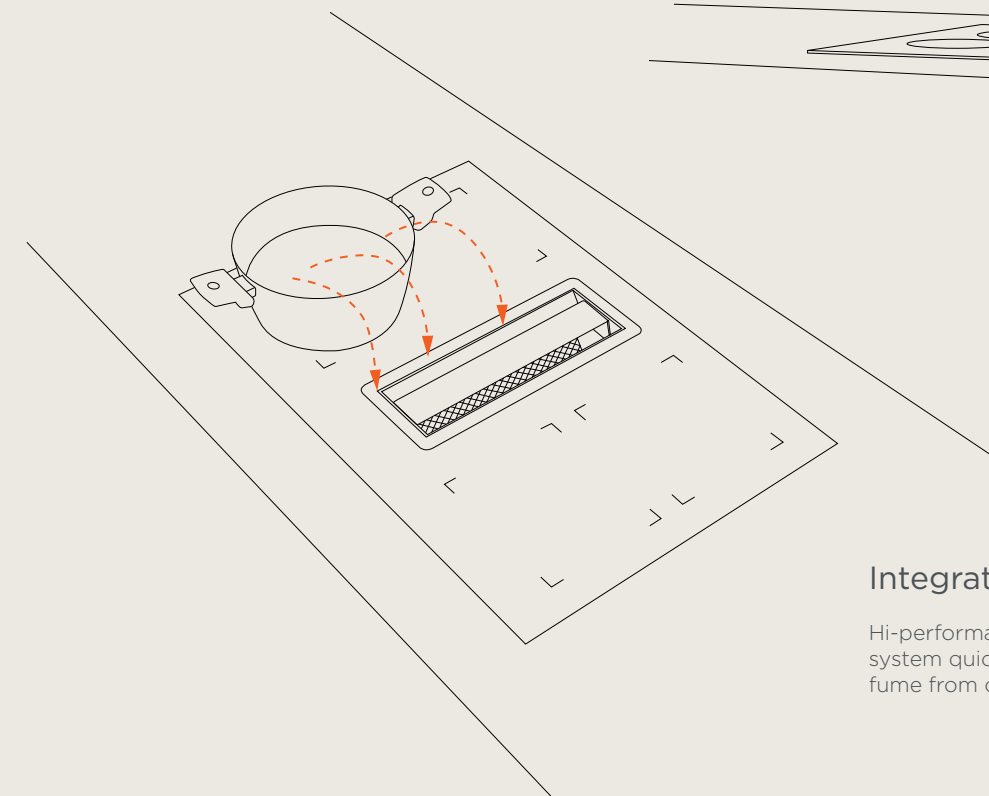

### Zone-focused extraction

The decorative hood provides extraction specific to the active cooking zone of the hob, thus focusing performance.

### Downdraft extraction

Cooking fume is extracted immediately before it disperses into the kitchen thanks to the practical countertop installation.

### Integrated extraction

Hi-performance extraction system quickly removes the fume from cooking surface

# hi<sup>+</sup> Series

THE TECHNOLOGY THAT MAKES LIFE EASIER IN THE KITCHEN: **SILVERINE HI!**

Whit the smart Hi application by Silverline, control your appliances in your kitchen from anywhere

Say hi to hi<sup>+</sup>

Welcome to High Intelligence kitchen experience.

With the Hi app, you will have the lot and experience the convenience of controlling your appliances in the kitchen any place you'd like. What awaits you is a unique kitchen experience that will make your life easier with many features offered by the smart Hi world.

## Adjust The Height

It is possible to adjust the hood height up and down. When not in use, it is raised to lock like a ceiling fixture.

## Led Ambient

You can enjoy your kitchen ambiance by changing the light of your hood & the ambience lighting on the ceiling with RGB and Tunable White mode via the App or with Alexa

## Filter Replacement Time

It informs you when it is time to clean or replace the grease and carbon filter. This esures that the high efficiency of your product is maintained.

## Air Quality is Continuously Monitored

Equipped with superior air quality sensors, Silverline Hi products keep the air quality maximized at all times.

- Simultaneous working of appliances in the kitchen
- Application control (iOS & Android)
- Filter life cycle reminding indicator (carbon filter & grease filter)
- Flavourful recipes for every taste
- Air quality sensor
- Humidity & Temperature sensor
- Voice control (With Alexa)

**SILVERLINE**  
**Perfect**  
**ION**

A Nano-Silver technology against the viruses and bacteria in your kitchen:  
**Silverline PerfectION**

Oil, fat and food residues in the kitchen can cause bacteria. Since we spend a lot of time in the kitchen and our foods touch many surfaces, it is important to ensure maximum hygiene in the kitchen.

Silverline PerfectION coats all the glass and metal surfaces of the products during production. It access the DNA and RNA codes of all the bacteria, fungi and viruses on the surfaces to eliminate them and ensures maximum hygiene.

**Continuous hygiene is possible:  
 Silverline PerfectION**

It is up to you to ensure that this level of hygiene continuous, both on Silverline products that are carefully sanitized and packaged after production, and later on in your kitchen. To ensure maximum hygiene against viruses and bacteria, all you need to do is use the PerfectION spray every 6 months. You can apply the PerfectION spray on all glass and metal surfaces of your Silverline products.

**What is Silverline PerfectION?**

Nano-silver ensures long-term antiviral and antibacterial effect on all surfaces.

- It kills both viruses and bacteria.
- It falls into the category of wide-spectrum high-level disinfectants thanks to the long-term effect it has.
- It kills enveloped and non-enveloped viruses as well as all gram positive and negative pathogens.

**Does PerfectION contain any harmful chemical allergens?**

Nano-silver is considered a natural antibiotic in global literature. The World Health Organization tolerates up to 100 ppm of silver in potable water..

**What is the application duration for Silverline PerfectION?  
 When can we start to use the area?**

The application duration is 10 to 15 minutes for an area of 100 m<sup>2</sup>. 10 minutes later, a layer of mist rolls in to stick to all surfaces and get activated.

**Is any preparation necessary before the application?**

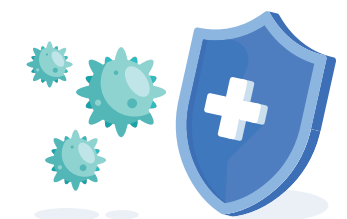

It is recommended not to leave exposed food in the application area. Open the cabinet doors to ensure that the inside of them are sanitized as well.

**How often Silverline PerfectION should be applied?**

The ideal frequency of application depends on the risk scope of each area. For Silverline products, it should be applied every 6 months to ensure maximum protection.

**Is it harmful to pets?**

According to the standards of the World Health Organization, 100 ppm of silver is tolerable in potable water. Nano Clear AG+ has 80 ppm. There is no side effect in case of inhalation or skin contact.

# Energy Class

A+++ | A++ | A+ | A | B | C | D

55cm

## HOB DISTANCE (ELECTRIC)

The distance between electric hob and hood.

65cm

## HOB DISTANCE (GAS)

The distance between gas hob and hood.

## CARBON FILTER

It makes sure your kitchen is kept odour-free. The filter filtrates vapours and grease created by cooking.

## REMOTE CONTROL

Control with a functional remote controller.

## APP CONTROL

Control with IOS and/or Android applications.

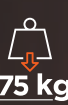

## SILVER CONNECT

Automatic adjustment of the hood speed according to the air flow by the cooker with Bluetooth.

## EASY INSTALLATION

Easy installation of hoods via spending less time and energy

75 kg

## WEIGHT

The weight of hood.

## LIGHTING (STANDARD)

The halogen lamp has high efficiency, quality of light, and high rated life.

## LED LIGHTING

Provides higher brightness with lower energy.

## LED STRIPE LIGHTING

Provides flexibility and color options which make it perfectly suited for many lighting applications.

## RGB LED LIGHTING

The color of the light is adjusted with the remote control.

## TUNABLE LED LIGHTING

Temperature value of white color.

## AUTOMATIC SENSORS

Automatic control for the functions.

## CUSTOMISATION

Provides panel options according to the customer's preference.

## AUTO MODE

Automatic hood system operating simultaneously with the hob for worktop hoods.

## HI SERIES

Guarantees brilliant cooking experience and fresh air by Hi technologies.

## MANUAL MODE

Manual control of hood functions.

V12 IQ

## V12 DYNAMIC IQ MOTOR

New generation engine technology with high energy efficiency, air extraction performance and very low noise level.

## ACTIVE FLEX CARBON FILTER

Flexible carbon filter that allows easy usage and replacement.

V12 AC

## HE V12 DYNAMIC IQ MOTOR

New generation engine technology with high energy efficiency, air extraction performance and very low noise level.

## FILTER LIFECYCLE INDICATOR

Alerts when filters are due for replacement.

## PLUG & PLAY

Easy installation without pipe kit.

## FULL SURFACE LIGHTING

Creates a brighter kitchen environment.

## AIR QUALITY INDICATOR

Air quality feedback to keep ambient air quality at the best level and automatic function.

## LIFT

Adjustable height for the hood.

2L

## WASTE WATER CAPACITY

Maximum waste water capacity of the product.

## AUTO FUNCTION

It enables the product to work automatically thanks to the data it receives from the sensors.

## SILVERMUTE

Products with a whisper-level sound.

## USING WITH PIPE

Usage with pipe for worktop hoods.

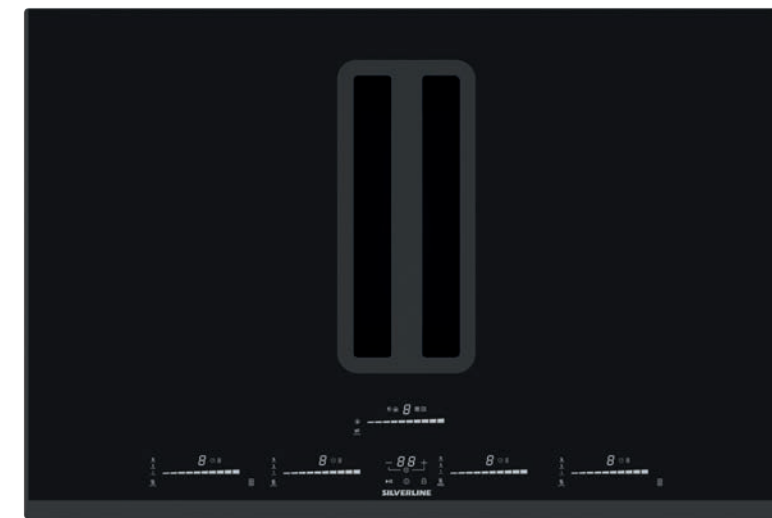

## STEAM SENSOR

It detects the steam and ensures that the hood works automatically.

## WORKTOP HOODS

The integrated hood in hob extracts unpleasant odors and steam emitted during cooking directly from the source. This ensures continued clean air flow in the kitchen.

# BUILT-IN HOODS

With a range of products for every kitchen type, Silverline can meet customer requirements with its cabinet solutions as well.

## Vapor Sensor

The sensor increases or decreases the suction speed of the product by detecting the density of the food vapor.

## Easily Emptied Water Collector

Accumulated water can be easily drained with a small bowl.

## Anti-Condensation

Inside Pro solves the condensation problem during the cooking experience with induction hobs.

With the anti-condensation key, the heater is activated and condensation is prevented.

The resistors prevent condensation on the surface by reducing the temperature difference between vapor and metallic components.

## Drop Control Filter And Water Tank

The filter keeps the condensation formed during cooking and the condensed water flows into the water tank thanks to the filter angle.

Even if the product is exposed to intense steam, water does not drip from the filter.

## OVENS

The kind of multi-functionality that adds taste to your meals and makes expert cooks envious at the same time is now integrated with a multi-dimensional understanding of design.

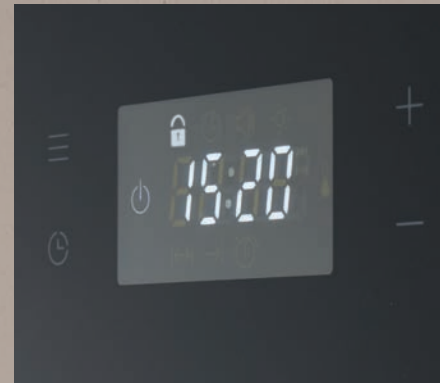

### MEAT PROBE

It gives very accurate cooking results by measuring the internal temperature of the food.

### TELESCOPIC RAIL

Allows you to remove trays easily from the oven. This makes usage of trays more convenient and easy to use.

### CHILD SCREEN LOCK

No matter what key your child plays on the screen, the settings of your oven can't be changed.

### COOL DOOR

The reflective glass on the inside of the door significantly reduces the temperature of the outer part of the door at all ovens. So, it provides a safer environment when preparing the delicious meals in the oven.

### 3D AIR FLOW

It provides proper heat distribution for uniform cooking and convenient for cooking up to 3 trays.

### LARGE CAVITY SIZE

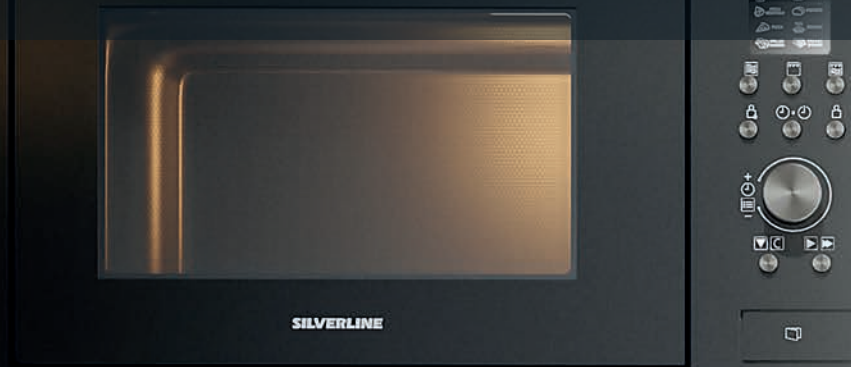

It gives flexibility to prepare larger meals with its 72 liter net volume.

## Easy Cleaning: It's time for a little magic!

Cleaning the oven can be an easy scrub free task with just a little bit of work. Silverline makes the cleaning of the ovens much easier by offering various cleaning solutions. They prolongs the life of your oven and help you save time every day to make your life easier in your kitchen.

12:05 29°C

SILVERLINE

### SELF CLEAN +

The quick and easy option for effortless cleaning thanks to catalytic panels. The back and side wall panels absorb dirt that splashes from food.

### SELF CLEAN

Above advantage is available only for back wall.

### SOFT CLOSE

It slows down the movement of the door and ensures your oven door closes gently.

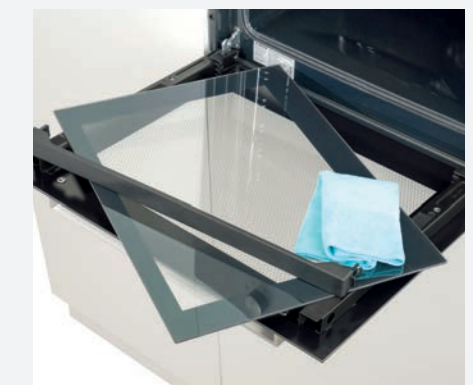

### SOFT OPEN CLOSE

It slows down the movement of the door and ensures your oven door opens and closes gently.

### EASY CLEANING

The easy cleaning for day to day maintenance.

### EASY EXTRACT

It enables to remove easily the front glass panels of the oven.

### ANTI - FINGER INOX

Anti-finger inox surface provides comfort in cleaning.

### STEAM CLEAN

The heat turns water into steam and softens food residuals for easy cleaning.

# LEGENDS

## OVENS

-  **BOTTOM RESISTANT:** To cook something which needs to crisp on the base but stay moist on the top. This function is best suited for foods which need more temperature at the base such as pastry and pizzas and it is great for gently cooking stews and casseroles.
-  **TOP RESISTANT:** Top resistant creates the perfect roasting or crisping effect. Helps with the browning of dishes such as those topped with cheese or potatoes, under a less fiery heat than grill.
-  **TOP RESISTANT + BOTTOM RESISTANT:** Cooks items which sit in the centre of the oven best. Use this conventional heating mode for roasting meat and vegetables or baking cakes.
-  **TOP RESISTANT + BOTTOM RESISTANT+ FAN:** Food is cooked evenly and quickly all around thanks to lower and upper resistants and the fan are simultaneously on. This mode is most suitable for delicate cooking such as cakes, pastries, biscuits.
-  **TOP RESISTANT + GRILL:** Food can be cooked extremely quickly using both the top resistant and the grill.
-  **TOP RESISTANT + GRILL + FAN :** Top resistant, grill and fan are activated simultaneously, so heat is spread throughout the oven and radiated over the grill's surface area. It is ideal for larger portions.
-  **TOP RESISTANT + FAN + RING HEATER + BOTTOM RESISTANT :** Top and bottom resistants, turbo fan and ring heater (located around the turbo fan) are activated simultaneously. It provides proper heat distribution for uniform cooking and convenient for cooking up to 3 trays.
-  **RING HEATER + FAN :** It is used for one or more levels cooking and frying. Ring heater and turbo fan are activated.
-  **DEFROST :** It ensures that the food defrosts in a couple of minutes without losing its nutritional value.
-  **BOOSTER:** The booster function is used for quick pre-heating to reach the desired cooking temperature. (It is not suitable for cooking food.)
-  **GRILL:** Grill resistant is used especially for food to be fried.
-  **FAN + BOTTOM RESISTANT :** For preparing pizza and dishes which require a lot of heat from underneath. The bottom heating element and the fan are activated.
-  **GRILL + FAN:** This indicates the simultaneous activation of the grill and the turbo fan and enables the cooking of small portions of white and red meat, sausage, etc.
-  **GRILL + FAN + BOTTOM RESISTANT :** Appropriate for roasts and cakes. The fan spreads the heat uniformly inside the oven.
-  **TURN SPIT (GRILL + SPIT) :** It is used for rotisserie such as roasted chicken etc.
-  **TURN SPIT + (TOP RESISTANT + GRILL + SPIT) :** It is used for rotisserie such as roasted chicken etc. It is ideal for larger portions.
-  **LIGHT:** All ovens have oven lamps but the oven lamp can be activated with an independent button in the models bearing this symbol.
-  **ECO ( FAN + RING HEATER ) :** More energy saving function for one or more levels cooking and frying. Ring heater and turbo fan are activated.
-  **STEAM CLEAN:** The heat turns water into steam and softens food residuals for easy cleaning.
-  **PYROLYTIC CLEAN:** It heats the inside of your oven to temperatures upwards of 480°C, turns food residual to ash.
-  **KEEP WARM :** Used for keeping food warm at a temperature ready for serving for a long period of time.
-  **GRILL + BOTTOM RESISTANT :** Special for roasts. It can be used for any piece, whatever its size.
-  **TOP FIRE + BOTTOM FIRE (GAS FURNACE) :** Top and bottom elements are activated.
-  **TOP FIRE (GAS FURNACE) :** Top element is activated.
-  **BOTTOM FIRE (GAS FURNACE) :** Bottom element is activated.
-  **IGNITION (GAS FURNACE) :** Automatic ignition for gas area.

# Steam Technology

Pastries with  
Steam Technology!  
**Crispy on the outside  
and soft on the inside.**

## **Crispy on the outside and soft on the inside!**

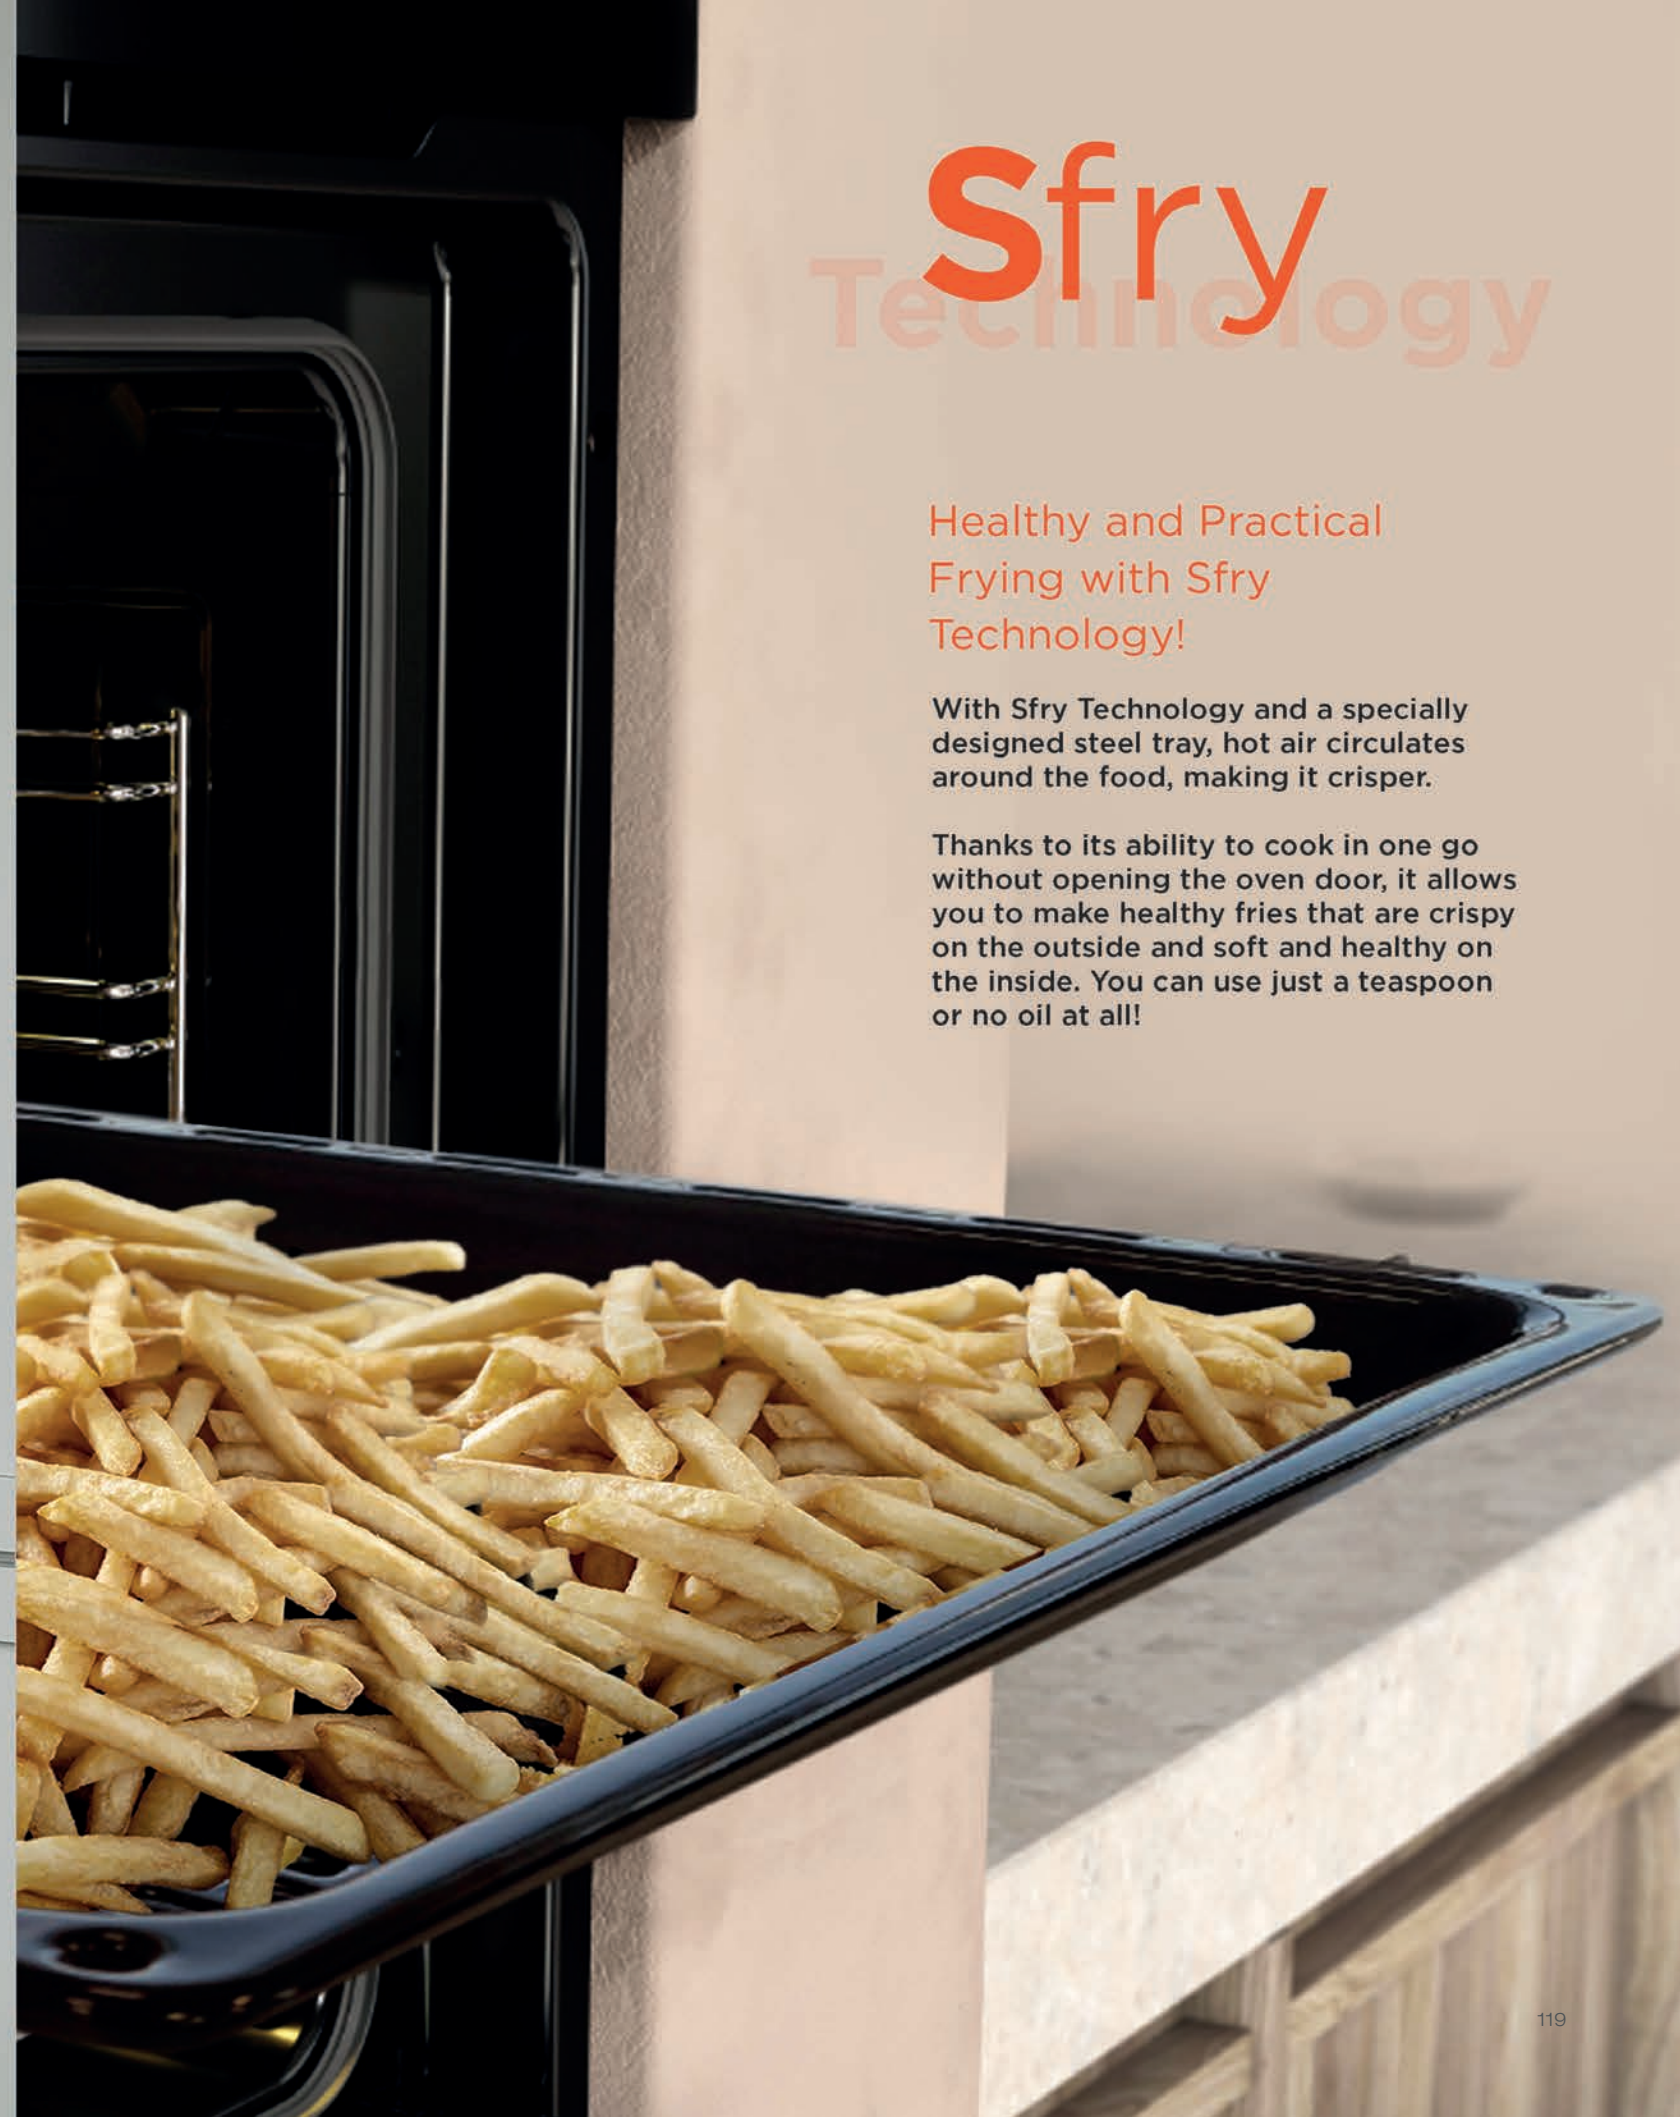

Silverline S4 Steam Assisted Ovens offer the feature of adding water during cooking without opening the oven door, preventing moisture loss for your meals while preparing crispy outside and soft inside.

# Sfry Technology

Healthy and Practical  
Frying with Sfry  
Technology!

With Sfry Technology and a specially designed steel tray, hot air circulates around the food, making it crisper.

Thanks to its ability to cook in one go without opening the oven door, it allows you to make healthy fries that are crispy on the outside and soft and healthy on the inside. You can use just a teaspoon or no oil at all!

# HOBS

Very step on the path to culinary art forms a part of a whole.  
Strong designs, advanced technology, multi-functionality.

**GAS HOB**

Combustion of gas is used as the source of heat.

**VITROCERAMIC HOB**

Intensive heat - resistant and shockproof ceramic glass surface (Resistant up to 850°C)

**INDUCTION HOB**

It is the high-frequency electromagnetic feature which transforms the container into a heat generator rather than conveying the heat it generated to the container

**EASY CLEANING**

Easy cleaning for day to day maintenance.

**WIDTH**

The width of the oven. (30-90 cm)

**FIRING IGNITION**

Automatic ignition system.

**FIRE CONTROL**

Gives you precise, convenient fire control over all cooking zones.

**SMART CONNECT**

It is possible to control the various functions of the hood directly from the hob.

**GAS PROOF SAFETY**

It cuts off the gas supply immediately to ensure full safety.

**BRIDGE**

Two separate cooking zones can be used as a single and large surface.

**AFTER HEAT INDICATOR**

The post-heating indicator shows whether it is safe to touch the surface.

**TIME ASSISTANCE**

The function of the closure of timer closes all of hotplates safety when selected time expired.

**CHILD SCREEN LOCK**

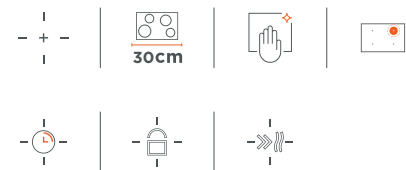

The child safety lock inhibits all functions of the hob with a single button.

**BOOSTER**

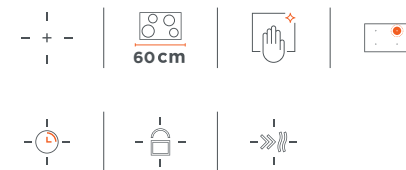

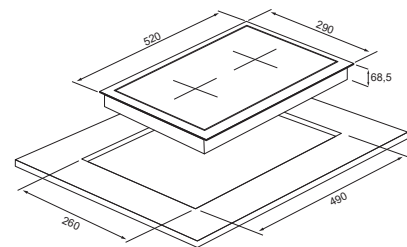

This function is used to heat the oven rapidly; it is not suitable for cooking food.

# REFRIGERATORS

With their advanced functions, Silverline refrigerators keep your food as fresh as the day they were stored.

### **LARGE CAPACITY**

Provides spacious storage area thanks to large inner volume.

### **ELECTRONIC CONTROL**

The "Electronic Control" panel allows the user to set separate temperatures for the fridge and the freezer.

### **VACATION MODE**

This function allows you to operate your refrigerator at low power when you are going to be away from home for a long time. When this function is selected, food in the freezer is kept as they are. To prevent bad odours in the freezer, the temperature is kept at around 12 degrees all the time. Moreover, you also save energy since the compressor does not run continuously in this mode.

### **ANTI-FINGER PRINT**

This feature ensures that the outer surface of the refrigerator looks clean at all times.

### **EXTRA COLD SECTION**

Designed specifically for dairy/breakfast items, the "Chiller Compartment" keeps food between -2°C and +3°C. This compartment is ideal for storing breakfast items and etc..

### **ARTIFICIAL INTELLIGENCE**

Thanks to the "Artificial Intelligence" function, the refrigerator detects the environmental temperature to set its own refrigerator, saving you the trouble of manual setting.

### **MOISTURE CONTROL (VEGETABLE)**

Without the humidity control function, the air inside the crisper evaporates, reaching the food and shortening its life. Thanks to the adjustable "Humidity-Controlled Crisper" function in your refrigerator, the air inside the crisper condenses to allow you to keep humidity ratios of the food under control. This way, food items are kept fresh for a longer time.

### **ICE MAKER**

"Rotary Ice Maker" makes ice in about 2-3 hours. Ice pieces in the container fall into the ice storage container below once the knob on it is turned. The ice storage container is only intended to store ice.

### **NO FROST**

The no-frost system isolates the freezer from humidity, ensuring that the air inside the fridge remains dry. Thus it prevents humidity and frosting on the inner walls of the product to ensure that food does not freeze. Thanks to this system, food items are frozen more quickly, more evenly and balanced matter, remaining as fresh as the first day.

### **BLUE LIGHT**

Equipped with sterilisation function, the "Blue Light" lighting function illuminates fruits and vegetables with a light that has the ideal wavelength, ensuring that they photosynthesise as they do in the nature. Food whose tastes and aromas are preserved remain fresh for a longer time and preserve the vitamin C they contain.

### **TOUCH CONTROL**

Along with a modern appearance, the "Touch Control" offers ease of use in terms of technologic aspects to allow the user to set separate temperatures for each compartment.

### **LED LIGHTING**

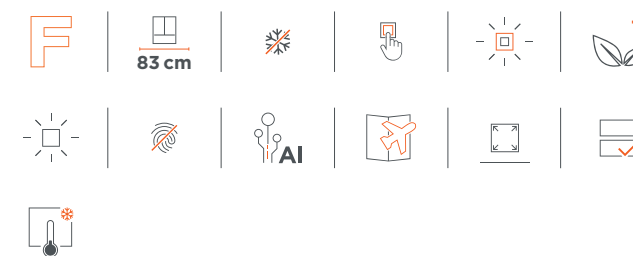

It provides a more powerful white light for the interior of the refrigerator.

## HIGH PERFORMANCE REFRIGERATION TECHNOLOGIES

An indispensable element of any kitchen with a unique design and essential functionality. SILVERLINE Refrigerators are equipped with significant technical features such as the Anti-Odor and Air Cleaning System with UV, LED and Platinum Rays, the Anti-bacterial System preventing bacterial growth and propagation, the Vitamin-C Fresh System ensuring moisture control that will allow fruit and vegetables to maintain their nutritional value for longer, and the Multiple Air Flow System that increases the efficiency of your refrigerator. The energy class refrigeration technology offers high performance with minimal operating noise. In addition to providing your kitchen with a contemporary look thanks to their elegant aesthetic and inox steel finish, they also maintain a clean appearance cleanliness thanks to their fingerprint-resistant surface. The changeable opening direction of the doors provides for flexible installation that can be adapted kitchens of all styles.
